

**DEPARTMENT OF WAR EDUCATION ACTIVITY (DoWEA)
PERFORMANCE WORK STATEMENT (PWS)
FOR
FORT CAMPBELL INTEGRATED PEST MANAGEMENT (IPM) SERVICES**

1.0 Introduction – Section

1.1 Background - Subsection

The Department of War Education Activity (DoWEA), as one of only two Federally operated school systems, is responsible for planning, directing, coordinating, and managing prekindergarten through 12th grade educational programs on behalf of the Department of War (DoD). DoWEA is globally positioned, operating 165 brick and mortar schools in eight districts located in seven states, 11 foreign countries, Guam, and Puerto Rico. DoWEA employs over 8,000 educators who serve more than 72,000 children. DoWEA also has a fully accredited virtual high school located in Virginia with teaching hubs in Europe and the Pacific.

DoWEA Fort Campbell proudly serves approximately 4,000 students across six schools, offering a comprehensive educational experience from Universal Preschool through 12th grade. Nestled within the home of the legendary 101st Airborne Division, the Screaming Eagles, our district is honored to support the families of this distinguished military community. The campus spans nearly 280 acres and includes close to 1 million square feet of learning space across multiple facilities. Fort Campbell is also home to DoWEA's first and only turf athletic field, complemented by a newly completed baseball and softball complex, underscoring our commitment to excellence in both academics and extracurricular activities.

1.2 Scope – Subsection

The Department of War Education Activity (DoWEA) Fort Campbell Community School District requires comprehensive Integrated Pest Management and Critter Control (IPMCC) services to maintain a safe, healthy, and sanitary environment for students, faculty, and staff. The contractor shall provide all necessary management, labor, tools, general and specialized equipment, licenses, permits, bonds, and transportation to perform pest control services in accordance with this Performance Work Statement (PWS) and the Pest Management Plan (PMP).

Services shall include the prevention, monitoring, and control of common nuisance pests such as flies, ants, spiders, cockroaches, beetles, rodents, and other insects. In addition, the contractor shall be capable of responding on short notice to wildlife intrusions involving snakes, skunks, raccoons, groundhogs, and similar animals that pose immediate health or safety risks. Timely response to such incidents is critical to ensure uninterrupted school operations and the protection of occupants. Any traps or control methods used must be safe for environments with children present, and appropriate precautions and coordination with school staff must be taken prior to deployment to ensure safety and minimize disruption.

The contractor shall deliver IPM and entomology services across all Fort Campbell Community buildings and grounds, utilizing standard industry practices, innovative techniques, and active quality control measures.

Major service elements include, but are not limited to:

- Ant and Roach Treatment
- Field and Turf Treatment
- Termite Treatment
- Wasp and Bee Treatment
- Rodent/Small Animal Control

2.0 Requirement Objectives – Section

The objective of this requirement is to ensure comprehensive and warranty-backed pest control services are provided across all DoWEA Fort Campbell properties in accordance with this Performance Work Statement (PWS). The contractor shall deliver a complete and effective solution that meets all specified requirements and objectives. Each pest treatment shall carry a minimum warranty period of 90 days, while termite treatments shall be warrantied for a minimum of three years. If pest activity reoccurs during the applicable warranty period, the contractor shall re-perform the necessary treatment(s) at no additional cost to the government. All treatments shall include coverage of the full interior and exterior boundaries of DoWEA properties. Additionally, the government reserves the right to incorporate the contractor's proposed technical approach into the final contract award.

2.1 Ant/Roach Treatment (Objective #1)

2.1.1 Scheduled Biannual Treatment. The contractor shall perform full interior and exterior pest control treatments for all DoWEA Fort Campbell facilities twice per year. The first application shall be conducted during Summer Break prior to the start of the new school year, and the second application shall be completed during Winter Break. Each treatment shall include all interior areas of the facilities and extend up to 30 feet from the exterior perimeter to ensure effective perimeter protection.

2.1.2 Coordinating and Scheduling. The contractor shall coordinate all treatment schedules with the Contracting Officer's Representative (COR) to ensure minimal disruption to school operations. Advance notice of service dates and the expected duration of work shall be provided to the COR to facilitate proper planning and communication with school leadership.

2.1.3 Follow- Up Services. The contractor shall monitor all treated areas for continued pest activity following each scheduled application. If pest activity persists, the contractor shall re-service the affected areas at no additional cost to the government to ensure effective resolution. All follow-up actions must be thoroughly documented and reported to the Contracting Officer's Representative (COR) to maintain transparency and accountability in service delivery.

2.1.4 Service Documentation. The contractor shall maintain detailed records of all pest control treatments, including the date of service, specific facility location, type of pest targeted, chemicals or products used, and any follow-up actions taken. These records shall be submitted to the Contracting Officer's Representative (COR) in the form of a service report within five business days following each treatment to ensure proper oversight and accountability.

Performance Standard #1:

All DoWEA Fort Campbell facilities receive biannual interior and exterior pest control treatments, including coverage up to 30 feet from the exterior perimeter. Kitchens and food service areas are treated in coordination with food service personnel using compliant products. Follow-up treatments are performed within the warranty period whenever pest activity persists, at no additional cost to the Government.

Acceptable Quality Level #1:

100% compliance with the contract's requirements.

2.2 Field/Turf Treatment (Objective #2)

2.2.1 Monthly Routine Treatment. The contractor shall conduct routine pest control inspections and treatments at all DoWEA Fort Campbell facilities and athletic fields on a monthly basis. These services shall include both interior and exterior areas and address a wide range of pests, including but not limited to mosquitoes, spiders, snails, slugs, bats, centipedes, and caterpillars. The contractor shall ensure that all areas are treated effectively to maintain a safe and sanitary environment for students, staff, and visitors.

2.2.2 Coordinating and Scheduling. The contractor shall coordinate all monthly treatment schedules with the Contracting Officer's Representative (COR) to ensure minimal disruption to school operations. Advance notice of service dates and the expected duration of work shall be provided to the COR to facilitate proper planning and communication with school leadership.

2.2.3 Follow-Up Services. The contractor shall monitor all treated areas for continued pest activity following each monthly service. If pest activity persists, the contractor shall re-service the affected areas at no additional cost to the government to ensure effective resolution. All follow-up actions must be thoroughly documented and reported to the COR to maintain transparency and accountability in service delivery.

2.2.4 Service Documentation. The contractor shall maintain detailed records of all monthly pest control treatments, including the date of service, specific facility location, type of pest targeted, chemicals or products used, and any follow-up actions taken. These records shall be submitted to the COR in the form of a service report within five business days following each treatment to ensure proper oversight and accountability.

Performance Standard #2:

Monthly pest inspections and treatments are conducted for all designated facilities, athletic fields, and outdoor areas, addressing identified pest activity using methods safe for human use

and protected pollinators. Services are documented and coordinated to minimize disruption to school operations, with follow-up treatment provided when necessary.

Acceptable Quality Level #2:

No more than two (2) validated complaints per month.

2.3 Termite Treatment (Objective #3)

2.3.1 As-Needed Termite Treatment. The contractor shall perform termite inspections and treatments at all DoWEA Fort Campbell facilities on an as-needed basis. Services shall include both interior and exterior areas of the affected facilities and shall be conducted using appropriate methods and materials to ensure effective eradication and prevention.

2.3.2 Coordinating and Scheduling. The contractor shall coordinate all termite treatment schedules with the Contracting Officer's Representative (COR) to ensure minimal disruption to school operations. Advance notice of service dates and the expected duration of work shall be provided to the COR to facilitate proper planning and communication with school leadership.

2.3.3 Follow-Up Services. The contractor shall monitor treated areas for continued termite activity following each service. If termite activity persists, the contractor shall re-service the affected areas at no additional cost to the government. All follow-up actions must be documented and reported to the COR to ensure accountability and effective resolution.

2.3.4 Service Documentation. The contractor shall maintain detailed records of all termite treatments, including the date of service, specific facility location, type of treatment performed, chemicals or products used, and any follow-up actions taken. These records shall be submitted to the COR in the form of a service report within five business days following each treatment.

Performance Standard #3:

Termite inspections and treatments are performed as needed for all DoWEA Fort Campbell facilities to prevent or eliminate termite activity. Treatments include interior and exterior areas, are completed using approved methods, and carry a minimum three-year warranty. Re-treatment is provided at no additional cost when activity reoccurs within the warranty period.

Acceptable Quality Level #3:

100% compliance with the contract's requirements.

2.4 Wasp/Bee Treatment (Objective #4)

2.4.1 Bi-Monthly Inspection and Treatment. The contractor shall conduct bi-monthly inspections for bee and wasp activity at all DoWEA Fort Campbell facilities, including playground equipment and playground canopies. If bee or wasp activity or nests are discovered, the contractor shall perform appropriate treatment. Inspections and treatments shall include exterior areas such as entrance ways, covered walkways, fencing, and playground areas extending up to 30 feet from the equipment, as well as interior areas when activity is identified.

2.4.2 Coordinating and Scheduling. The contractor shall coordinate all inspection and treatment schedules with the Contracting Officer's Representative (COR) to ensure minimal disruption to school operations. Advance notice of service dates and the expected duration of work shall be provided to the COR to facilitate proper planning and communication with school leadership.

2.4.3 Urgent Service Response. When bee or wasp activity is deemed urgent by the COR, the Contracting Officer shall authorize services using oral ordering procedures. The contractor shall respond within 2 hrs.

2.4.4 Removal of Nests and Deceased Insects. The contractor shall attempt to locate and remove deceased bees or wasps within the affected area, along with any nests or hives, to ensure complete resolution and prevent recurrence.

2.4.5 Service Documentation. The contractor shall maintain detailed records of all inspections and treatments, including the date of service, specific location, type of pest activity identified, treatment performed, and any follow-up actions taken. These records shall be submitted to the COR in the form of a service report within five business days following each treatment.

Performance Standard #4:

Bi-monthly inspections are conducted for bee and wasp activity at all facilities, playground equipment, and covered areas. Identified nests or activity are treated promptly, with urgent requests responded to within the required timeframe. Nests and deceased insects are removed to prevent recurrence and ensure student and staff safety.

Acceptable Quality Level #4:

No more than one (1) validated complaint per month.

2.5 Rodent/Small Animal Control (Objective #5)

2.5.1 Quarterly and As-Needed Rodent Control. The contractor shall perform rodent control services at all DoWEA Fort Campbell facilities four times per year and upon request when rodent activity is identified. Services shall include inspection and treatment of both interior and exterior areas to ensure effective control and prevention.

2.5.2 Urgent Service Response. When rodent/small animal activity is deemed urgent by the COR, the Contracting Officer shall authorize services using oral ordering procedures. The contractor shall respond within 2 hrs.

2.5.3 Coordinating and Scheduling. The contractor shall coordinate all rodent control service schedules with the Contracting Officer's Representative (COR) to ensure minimal disruption to school operations. Advance notice of service dates and the expected duration of work shall be provided to the COR to facilitate proper planning and communication with school leadership.

2.5.4 Removal and Odor Control. The contractor shall attempt to locate and remove any deceased rodents within the affected area. If necessary, odor control methods shall be applied to treat any residual odors resulting from pest activity or removal.

2.5.5 Service Documentation. The contractor shall maintain detailed records of all rodent control services, including the date of service, specific facility location, type of activity identified, treatment performed, and any follow-up actions taken. These records shall be submitted to the COR in the form of a service report within five business days following each treatment.

Performance Standard #5:

Quarterly and as-needed rodent and small-animal control services are conducted for all designated facilities. Services include inspection, treatment, removal of deceased animals, and odor mitigation when required. Urgent requests are responded to within required timelines and fully documented.

Acceptable Quality Level #5:

No more than two (2) validated complaints per month.

3.0 Constraints – Section

3.1 Time Constraints

Work may be performed outside of normal school hours—including evenings, weekends, and school breaks—at no additional cost to the Government, provided it is coordinated with and approved by the Contracting Officer’s Representative (COR). Normal school operating hours are Monday through Friday, 0700 to 1630, excluding federal holidays. During these hours, extra caution must be exercised when working inside buildings to ensure safety and minimize disruption. No work shall be performed on federal holidays unless specifically authorized by the COR. Recognized federal holidays are listed in the following table:

Federal Holiday	Date
New Year’s Day	January 1
Martin Luther King Jr. Day	Third Monday in January
Presidents’ Day	Third Monday in February
Memorial Day	Last Monday in May
Juneteenth Day	June 19
Independence Day	July 4
Labor Day	First Monday in September
Columbus Day	Second Monday in October
Veterans Day	November 11
Thanksgiving Day	Fourth Thursday in November
Christmas Day	December 25

In the event of severe weather, elevated threat levels, or other emergencies resulting in school closures or delayed openings, contractor personnel shall not report to affected locations unless specifically directed by the COR.

3.2 Geographic and Logistical Constraints

The contractor shall perform services at all designated DoWEA Fort Campbell facilities, including schools, administrative buildings, athletic field houses, playgrounds, and associated outbuildings. A complete list of service locations is provided in Attachment #2 - Campbell Facilities Information. Pest control treatments must include all interior areas and extend up to 30 feet from the exterior of each facility, ensuring full boundary coverage of DoWEA properties. Contractor vehicles must comply with Fort Campbell access requirements and be registered with the Provost Marshal's Office. Delays at installation checkpoints due to vehicle inspections or identification checks are not reimbursable, and contractors are expected to plan accordingly to meet scheduled duty times. Parking must be in designated areas only; contractor personnel shall not park in spaces reserved for government vehicles, school staff, or visitors, nor block fire lanes at any time.

3.3 Security Constraints

All contractor personnel must obtain and carry valid base access credentials and always wear company-issued identification badges while on site. These badges must include a recent photo, the employee's name, company name, and expiration date, and must be visible while on government premises. Contractors are required to comply with DoWEA visitor policies, including signing in daily at each school where work is performed during school hours.

Services under Section 2.1 shall be performed exclusively during Summer Break and Winter Break periods when students are not present in school facilities. If work is required to be performed while school is in session and in the presence of students or performance falls outside the scope established in this contract, the contractor shall ensure that all contractor personnel comply with the background investigation requirements set forth in DoD Manual 1402.05. Contractor personnel shall not perform work during normal instructional hours unless expressly authorized in writing by the Contracting Officer's Representative (COR).

Personnel must maintain professional conduct and appearance, avoiding any behavior that could be considered disruptive, inappropriate, or unsafe. This includes refraining from verbal or physical contact with students or staff, avoiding offensive language or gestures, and adhering to dress codes appropriate for a pre-kindergarten through 12th grade school environment.

The Government will provide the contractor with keys necessary to access designated facilities. All keys must be signed out and tracked by the contractor, who shall develop and maintain a Key Control Plan outlining procedures for secure handling, storage, and accountability. In the event of a lost or stolen key, the contractor must immediately notify the Contracting Officer's Representative (COR) and the Military Police (MPs). The contractor shall be fully responsible

for the cost of rekeying all affected buildings and areas, and must coordinate with the COR to ensure timely and secure resolution.

Contractor personnel shall comply with all Fort Campbell installation access procedures, Force Protection Condition (FPCON) measures, and any additional access controls in effect at the time of performance. Access delays or restrictions resulting from security posture changes are not reimbursable.

3.4 Safety Constraints

Contractor personnel must follow all installation regulations regarding fire safety, environmental protection, sanitation, and security. Vehicles must be parked only in designated areas and must not block fire lanes or occupy spaces reserved for government or school staff. All pesticides must be EPA- and state-registered, securely stored off government property or in locked compartments within contractor vehicles, and applied only by certified personnel. Mixing of pesticides on government property is strictly prohibited. Personal Protective Equipment (PPE) must be provided and used as required by pesticide labels and safety data sheets (SDS).

In the event of a pesticide spill or other hazardous incident, the contractor must immediately notify the COR and relevant base authorities and is financially responsible for cleanup and decontamination. The contractor must also ensure that all buildings, gates, and fences are properly secured upon departure and that no unauthorized personnel are granted access. Any damage caused to government property must be reported within 24 hours and repaired or replaced at no cost to the government. Additionally, contractor personnel must comply with all Force Protection Condition (FPCON) protocols and be prepared to adjust operations based on changing threat levels as directed by the installation commander or COR.

3.5 Personnel and Certification Constraints

The contractor shall provide a sufficient number of experienced and qualified personnel to ensure high-quality performance of all services required under this contract. All personnel must be trained in Integrated Pest Management (IPM) principles and practices and must adhere to a written IPM policy outlining the contractor's objectives. The contractor shall designate a Program Manager (PM) who will serve as the primary point of contact with the Government during normal working hours. The PM must be capable of conducting technical and non-technical discussions and translating them into clear, grammatically correct documentation. An alternate shall be designated to act in the PM's absence, with full authority to make decisions on behalf of the contractor. On-site supervisors and the designated Program Manager (PM) must be fluent in English to ensure clear communication with Government personnel and to support accurate documentation.

Contractor personnel must maintain up-to-date certifications and comply with all federal, state, local, DoD, and installation-specific health and safety regulations. All pesticide applicators must possess current commercial certification in the appropriate EPA-approved state categories. Private applicator or technician certifications are not acceptable. Proof of certification must be

provided prior to contract award. Additionally, the contractor shall provide medical surveillance for all pesticide applicators, including initial and annual physical exams and cholinesterase level monitoring, in accordance with AR 40-5 and 29 CFR 1910 (www.osha.gov and www.armyresilience.army.mil). Results must be made available to the Contracting Officer or COR upon request.

Only personnel who maintain required certifications, medical surveillance, and installation access eligibility may be assigned to perform work under this contract. Personnel who fail to meet or maintain these requirements shall be removed from contract performance.

3.6 Vehicle and Equipment Constraints

The contractor shall provide all vehicles, tools, equipment, and supplies necessary to fulfill the requirements of this contract. All equipment must be used in accordance with manufacturer recommendations and meet all applicable safety standards. Electrical equipment must be UL-approved and compatible with existing building circuits. The contractor is responsible for ensuring that no equipment exceeds the power capacity of the facility's electrical infrastructure. All pesticide application and pest control equipment must be clearly labeled with the company name, a point of contact, and phone number. Equipment must be in good working condition, free of leaks or deterioration, and calibrated to apply pesticides according to label specifications. Calibration records must be maintained and made available to the COR upon request.

Vehicles used for pest control operations must meet Fort Campbell installation standards and display the contractor's company name. These vehicles must include lockable storage compartments for pesticides, which must be secured when not in use. Vehicles shall not be used for any purpose other than pest control operations under this contract and must be equipped with a fire extinguisher, emergency wash water, portable eye wash station, and a spill and decontamination kit. All pesticides must be stored in a locked compartment separate from the vehicle cab. Vehicles are subject to inspection and must comply with all base access procedures, including registration with the Provost Marshal's Office. The contractor is responsible for ensuring timely access to the installation and will not be reimbursed for delays at security checkpoints.

4.0 Government-Furnished Resources Section

4.1 Government Furnished Property/Equipment (GFP/GFE)

The Government will provide access to all facilities necessary for the performance of services outlined in this PWS and the contractor's approved Work Plan. This includes access to buildings, utilities, and existing infrastructure. Utilities such as electricity and water will be furnished at no cost in Government-owned facilities, and the contractor is expected to use them prudently in accordance with energy conservation policies (located within Integrated Pest Management (IPM)). The contractor shall be responsible for providing necessary service lines from existing outlets to the work site. All electrical equipment used by the contractor must be Underwriters Laboratory (UL) approved and compatible with existing building circuits. The contractor is

responsible for ensuring that no equipment exceeds the power capacity of the facility's electrical infrastructure. Should the Government provide any materials or equipment, the contractor must inventory, sign for, maintain, and return them in the same condition or replace them with items of equal quality and condition.

4.2 Government Furnished Information/Materials (GFI/GFM)

The Government will provide the contractor with access to all technical information, facility map (Attachment #3), pest management records, and other relevant documentation necessary to fulfill the contract requirements. This information will be made available through the Contracting Officer's Representative (COR) upon contract award. The contractor is responsible for safeguarding all Government-furnished information and ensuring it is used solely for the performance of this contract. Any loss, misuse, or unauthorized disclosure of such information must be reported to the COR immediately.

5.0 Contract Data Deliverables Section

<i>Milestone/Deliverable</i>	<i>Format</i>	<i>No. of Copies</i>	<i>PWS Reference</i>	<i>Frequency/Delivery Date</i>	<i>Submit To</i>
Pest Control Service Report	Word or PDF	2	2.1.4, 2.2.4, 2.3.4, 2.4.5, 2.5.4	Within five business days following each treatment	COR
Treatment Schedule Notification	Email or Word	1	2.1.2, 2.2.2, 2.3.2, 2.4.2, 2.5.2	Minimum five business days prior to scheduled service	COR
Follow-Up Action Report	Word or PDF	2	2.1.3, 2.2.3, 2.3.3, 2.4.3, 2.5.3	Within five business days of follow-up service	COR
Certification Documentation for Applicators	PDF	1	3.5	Prior to contract award and upon renewal or personnel change	COR
Medical Surveillance Records (Applicators)	PDF	1	3.5	Initial and annual submission; upon request	COR
Equipment Calibration Records	PDF or Excel	1	3.6	Upon request or annually	COR
Incident Report (e.g., pesticide spill, property damage)	Word	2	3.4	Notification within 24 hours; written report within 72 hours	COR

6.0 Definitions – Section

Term	Definition
Contracting Officer (KO)	The Government official with the authority to enter into, administer, and terminate contracts. The KO is the only individual authorized to make changes to the contract.
Contracting Officer's Representative (COR)	An individual designated in writing by the KO to perform specific technical and administrative functions related to contract oversight. The COR monitors contractor performance, ensures compliance with the PWS, and serves as the primary point of contact for coordination.
Integrated Pest Management (IPM)	A comprehensive approach to pest control that combines biological, cultural, physical, and chemical tools in a way that minimizes economic, health, and environmental risks.
Pest Management Plan (PMP)	A written plan outlining the procedures, schedules, and methods used to implement IPM strategies across DoWEA Fort Campbell facilities.
Critter Control (CC)	A subset of pest management services focused on the humane removal and control of wildlife such as snakes, skunks, raccoons, and other animals that pose health or safety risks.
Acceptable Quality Level (AQL)	The minimum performance standard or margin of error allowed under the contract. AQLs are used to measure contractor compliance and service quality.
Service Report	A written document submitted by the contractor detailing the date of service, location, type of pest activity, treatment performed, chemicals used, and any follow-up actions.
EPA-Registered Pesticide	A pesticide product that has been reviewed and approved by the Environmental Protection Agency for safe use according to label instructions.
Medical Surveillance	A health monitoring program for pesticide applicators that includes physical exams and cholinesterase level testing, as required by AR 40-5 and 29 CFR 1910.
Force Protection Condition (FPCON)	A system used by the Department of Defense to describe and respond to varying levels of terrorist threats. Contractor operations may be adjusted based on current FPCON levels.

7.0 Performance Requirement Summary (PRS) - Section

<i>Objective</i>	<i>Performance Standard</i>	<i>AQL</i>	<i>Method of Surveillance</i>	<i>Inspector</i>
Objective	Performance Standard	AQL	Method of Surveillance	Inspector
2.1 Ant/Roach Treatment	Facilities are treated biannually with full interior and 30-ft exterior coverage. Follow-up services provided as needed.	100% compliance	Review of service reports and random inspections	COR
2.2 Field/Turf Treatment	Monthly inspections and treatments conducted across all facilities and athletic fields.	No more than 2 validated complaints per month	Monthly review of service reports and customer feedback	COR
2.3 Termite Treatment	As-needed inspections and treatments with 3-year warranty coverage.	100% compliance	Random inspections and review of service documentation	COR
2.4 Wasp/Bee Treatment	Bi-monthly inspections and treatments, including urgent response capability.	No more than 1 validated complaint per month	Monthly review of service reports and urgent response logs	COR
2.5 Bus Staging Rodent Treatment	Quarterly and as-needed rodent control with odor mitigation and removal of deceased pests.	No more than 2 validated complaints per quarter	Quarterly review of service reports and random inspections	COR

7.1 Quality Assurance Surveillance Plan (QASP) – Subsection

The Government will utilize a Quality Assurance Surveillance Plan (QASP) to monitor contractor performance throughout the contract period. Surveillance methods include:

- Direct Observation: On-site inspections during and after service delivery.
- Document Review: Evaluation of service reports, certifications, and incident documentation.
- Customer Feedback: Review of complaints and satisfaction surveys from school staff and administrators.
- Random Inspections: Unannounced checks of treated areas to verify compliance.

The QASP may be updated unilaterally by the Government to reflect changes in performance expectations or operational needs.
